DB/IQ QE QE for DB2® Eclipse Plug-In

QA Eclipse® Plug-In

ADVANTAGES

DB/IQ QA – Eclipse plug-In is fully compatible with RDz® and adapts enterprise-wide standards for all development made outside the mainframe.

BENEFITS

Detect and fix SQL problems during development

Control the quality of non-mainframe development

Increase developers' awareness by establishing programming rules and by providing clear detailed explanation of the DB2® access paths

Allow developers to use DB/IQ QA on all SQL without leaving the Eclipse IDE

FEATURES

Check on-the-fly with more than 300 QA rules

Interactive quality control and full EXPLAIN functionality for all SQL statements at source statement level

Provides the SQL developer with a detailed EXPLAIN analysis, including support of hidden EXPLAIN tables

Eclipse plug-In uses the QA functionality known from DB/IQ QA macro EXQA

All SQL statements easily benchmarked together with their DB2 access paths

Data volume and scan magnitude displayed with all relevant optimizer statistics
